

ID badge-charging dock

Description

Drop your Noccela ID badge in the charging dock on your way out of the workplace to ensure zero downtime of the device when it's in use. Noccela ID badge-charging dock is a bulk charger that takes the responsibility off the individuals' shoulders to keep track of their ID badges' battery lives and charge them separately. Noccela ID badge-charging dock is used as a device-returning dock at clock-in and – out gateways of the workplaces that use Noccela safety and smart factory solutions. It has been engineered to be highly reliable and secure.

Features

- 48 pcs of individual charging slots.
- Place on a table or attach on the wall with screws.
- Easy plug-in to 100-240V power outlet. Includes detachable EU power cable.
- Secure and reliable.
