

# Andon Button

## Description

The wireless device is designed to attach anywhere immobile such as on a wall or table. It can be used to call for assistance in any application such as industrial Andon feature, personal assistance in retail, panic call in healthcare, and as an evacuation system activator. As the device communicates the real-time location data along with the request, it can easily change its attached location without any configuration prerequisites. It has been engineered to be highly reliable and secure.

## Features

- Up to centimeter-accuracy
- Low power usage — typical battery life of 1 ~ 5 years depending on usage and environment
- Replaceable batteries
- LED— two-way communication indication
- Button— tactical use button
- Compact design
- Easy to attach — double-sided tape
- Secure and reliable

## Technical Specifications

Dimensions (L x W x H)	105 x 57 x 20 mm (4.13 x 2.24 x 0.79 in)
Environment	Indoor, operating temperature 0 °C ~ 50 °C (32 °F ~ 122 °F)
Weight	65 g (0.143 lb) without batteries
Attachment	Double-sided tape
Battery	Two replicable LR03 (AAA) batteries
Radio	UWB
Antenna Type	Integral
Certifications	CE , FCC (pending), & ISED (pending)
