

# NOCCELA

## Beacon 2

### Description

Locate your Noccoela compatible devices with high accuracy and low latency. Noccoela Beacon 2 is an easy-to-install cloud-managed positioning beacon. Its robust design allows it to be installed in almost all kinds of environments including outdoors in extreme weather conditions, and dusty and humid industrial sites. It has been engineered to be highly reliable and secure.

### Features

- Up to centimeter-accuracy
- Unlimited tag capacity. Active tag capacity of 896 when positioning frequency is 1 Hz. Tags become inactive when not moving
- Robust design — withstands humid environments and extreme temperatures.
- Easy to install
- Easy USB-B power and ethernet cabling
- Large area coverage, typically 70-500 m<sup>2</sup> (753-5382 ft<sup>2</sup>) per beacon
- Secure and reliable
- Factory colors are black and white — custom colors available

### Technical Specifications

<b>Dimensions</b>	Radius 180 mm (~7.08 in), height 250mm (~ 9.84 in)
<b>Environment</b>	Indoor and outdoor, operating temperature 0 °C ~ 50 °C (32 °F ~ 122 °F)
<b>Weight</b>	1250 g (~2.76 lbs)
<b>Mounting</b>	With a threaded bar (M10)
<b>Power Consumption</b>	~3 W
<b>Radio</b>	UWB
<b>Antenna Type</b>	Internal
<b>Interface</b>	A 10/100 Mbps LAN Port
<b>Certifications</b>	CE, FCC (pending), & ISSED (pending)
